Serial No:		

### www.sonifex.co.uk/register

### **Product Warranty - 2 Year Extended**

As standard, Sonifex products are supplied with a 1 year back to base warranty. In order to register the date of purchase and so that we can keep you informed of any product design improvements or modifications, it is important to complete the warranty registration online. Additionally, if you register the product on the Sonifex website, you can increase your product warranty to 2 years. Go to the Sonifex website at: www.sonifex.co.uk/register to apply for your 2 year warranty.

### Sonifex Warranty & Liability Terms & Conditions

#### 1. Definition

'the Company' means Sonifex Ltd and where relevant includes companies within the same group of companies as Sonifex Limited.

'the Goods' means the goods or any part thereof supplied by the Company and

where relevant includes: work carried out by the Company on items supplied by the Purchaser; services supplied by the Company; and software supplied by the Company.

'the Purchaser' means the person or organisation who buys or has agreed to buy the Goods.

'the Price' means the Price of the Goods and any other charges incurred by the Company in the supply of the Goods.

'the Warranty Term' is the length of the product warranty which is usually 12 months from the date of despatch; except when the product has been registered at the Sonifex website when the Warranty Term is 24 months from the date of despatch.

'the Contract' means the quotation, these Conditions of Sale and any other document incorporated in a contract between the Company and the Purchaser.

This is the entire Contract between the parties relating to the subject matter hereof and may not be changed or terminated except in writing in accordance with the provisions of this Contract. A reference to the consent, acknowledgement, authority or agreement of the Company means in writing and only by a director of the Company.

#### 2. Warranty

- a. The Company agrees to repair or (at its discretion) replace Goods which are found to be defective (fair wear and tear excepted) and which are returned to the Company within the Warranty Term provided that each of the following are satisfied:
  - notification of any defect is given to the Company immediately upon its becoming apparent to the Purchaser;
  - ii. the Goods have only been operated under normal operating conditions and have only been subject to normal use (and in particular the Goods must have been correctly connected and must not have been subject to high voltage or to ionising radiation and must not have been used contrary to the Company's technical recommendations);
  - iii. the Goods are returned to the Company's premises at the Purchaser's expense:
  - iv. any Goods or parts of Goods replaced shall become the property of the Company:
  - no work whatsoever (other than normal and proper maintenance)
     has been carried out to the Goods or any part of the Goods without the Company's prior written consent:
  - the defect has not arisen from a design made, furnished or specified by the Purchaser:
  - the Goods have been assembled or incorporated into other goods only in accordance with any instructions issued by the Company;
  - viii. the defect has not arisen from a design modified by the Purchaser;
  - ix. the defect has not arisen from an item manufactured by a person other than the Company. In respect of any item manufactured by a person other than the Company, the Purchaser shall only be entitled to the benefit of any warranty or guarantee provided by such manufacturer to the Company.
- b. In respect of computer software supplied by the Company the Company does not warrant that the use of the software will be uninterrupted or error free.
- c. The Company accepts liability:
  - for death or personal injury to the extent that it results from the negligence of the Company, its employees (whilst in the course of their employment) or its agents (in the course of the agency);
  - ii. for any breach by the Company of any statutory undertaking as to title, quiet possession and freedom from encumbrance.
- d. Subject to conditions (a) and (c) from the time of despatch of the Goods from the Company's premises the Purchaser shall be responsible for any defect in the Goods or loss, damage, nuisance or interference whatsoever consequential economic or otherwise or wastage of material resulting from or caused by or to the Goods. In particular the Company shall not be liable for any loss of profits or other economic losses. The Company accordingly excludes all liability for the same.

- At the request and expense of the Purchaser the Company will test the Goods to ascertain performance levels and provide a report of the results of that test. The report will be accurate at the time of the test, to the best of the belief and knowledge of the Company, and the Company accepts no liability in respect of its accuracy beyond that set out in Condition (a).
- f. Subject to Condition (e) no representation, condition, warranty or other term, express or implied (by statute or otherwise) is given by the Company that the Goods are of any particular quality or standard or will enable the Purchaser to attain any particular performance or result, or will be suitable for any particular purpose or use under specific conditions or will provide any particular capacity, notwithstanding that the requirement for such performance, result or capacity or that such particular purpose or conditions may have been known (or ought to have been known) to the Company, its employees or agents.
- i. To the extent that the Company is held legally liable to the Purchaser for any single breach of contract, tort, representation or other act or default, the Company's liability for the same shall not exceed the price of the Goods.
  - The restriction of liability in Condition (g)(i) shall not apply to any liability accepted by the Seller in Condition (c).
- Where the Goods are sold under a consumer transaction (as defined by the Consumer Transactions (Restrictions on Statements) Order 1976) the statutory rights of the Purchaser are not affected by these Conditions of Sale.

#### **Unpacking Your Product**

Each product is shipped in protective packaging and should be inspected for damage before use. If there is any transit damage take pictures of the product packaging and notify the carrier immediately with all the relevant details of the shipment. Packing materials should be kept for inspection and also for if the product needs to be returned.

The product is shipped with the following equipment so please check to ensure that you have all of the items below. If anything is missing, please contact the supplier of your equipment immediately.

Item	Quantity
Product Unit	1

#### Repairs & Returns

Please contact Sonifex or your supplier if you have any problems with your Sonifex product. Email technical.support@sonifex.co.uk for the repair/upgrade/returns procedure, or for support & questions regarding the product operation.

### **Conformity**

The products in this manual comply with the essential requirements of the relevant European health, safety and environmental protection legislation. The technical justification file for this product is available at Sonifex Ltd. The declaration of conformity can be found at: https://www.sonifex.co.uk/declarations

#### **WEEE Directive**

The Waste Electrical and Electronic Equipment (WEEE) Directive

was agreed on 13 February 2003, along with the related Directive 2002/95/EC on Restrictions of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS). The Waste Electrical and Electronic Equipment Directive (WEEE) aims to minimise the impacts of electrical and electronic equipment on the environment during their life times and when they become waste. All products manufactured by Sonifex Ltd have the WEEE directive label placed on the case. Sonifex Ltd will be happy to give you information about local organisations that can reprocess the product when it reaches its "end of use", or alternatively all products that have reached "end of use" can be returned to Sonifex and will be reprocessed correctly free of charge.

#### **Atmosphere/Environment**

This apparatus should be installed in an area that is not subject to excessive temperature variation (<0°C, >50°C), moisture, dust or vibration.

This apparatus shall not be exposed to dripping or splashing, and no objects filled with water, such as vases shall be placed on the apparatus.

#### **DIO Audiophile Dante® Interfaces**

The DIO Audiophile Dante® Interfaces are simple plug and play audio devices which provide a convenient and elegant method of connecting legacy analogue and digital audio equipment to the Dante AoIP audio network.

There are a range of different products to suit different needs and this handbook is for the following product:

• AVN-DIO03 Dante to Headphone Output

The D/A circuitry offers 114dB of dynamic range - ten times better than similar competing products \*. All DIO products use Dante Controller for configuration and are powered by PoE. They use rugged aluminium boxes with side slots for screw-mounting and contain superior audio circuitry for optimal audio performance. All feature rugged Neutrik EtherCon® connectors and Neutrik lockable audio connectors for ultra-reliable connectivity.

\* Note: Because the output of this device is unbalanced, performance is 6dB lower than for balanced AVN-DIO products.

#### **AVN-DIO03**

The AVN-DIO03 is a Dante to headphone converter in the Sonifex DIO range of Dante input/output devices. It features a ¼ inch and 3.5mm jack socket in parallel and one Neutrik EtherCon® connector for direct connection to a Dante AoIP network. Pick any available Dante channels as the inputs of the DIO03 via Dante Controller.

#### Volume Adjustment

The front panel potentiometer adjusts headphone volume from mute (fully anticlockwise) to +6dB of gain when fully clockwise. This is useful if the Dante stream level is low and requires boosting.

#### Limite

A simple headphone limiter is included to prevent hearing damage by limiting the audio level sent to the headphones. The limit level can be set using a trimmer adjustment tool, or small flat blade screwdriver, between approximately -12dBu (fully anticlockwise) and OdBu (fully clockwise).

When limiting, the blue limit LED will illuminate. This should prompt the user to turn the headphone volume down until the blue LED extinguishes, as audio quality will be reduced whilst the limiter is active.

4

Fig 1-1: AVN-DIO03 Front and Rear View

## Setup

The DIO Dante device is configured with a dynamic network address, so to initially get the unit working, connect it to a network with a DHCP server (such as a router) and a suitable IP address will be given to the unit. Once connected,

a different IP address can be given to the DIO using Dante Controller. See the following section on Network Troubleshooting if you're having problems connecting your DIO device.

Simply plug an Ethernet connector into the Ethernet port of the DIO and the other end of the Ethernet connector into a PoE enabled switch. Alternatively, if the switch doesn't support PoE, a PoE adaptor can be used to provide the

The audio inputs/outputs should be connected to the legacy equipment and this allows the legacy equipment to transmit audio and receive audio through the

A computer on the Dante® network can then configure connections between the DIO and other Dante® enabled devices, using Dante Controller.

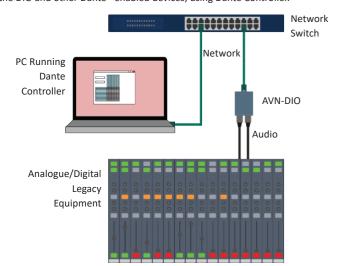

Fig 1-1: Setup

### Link

Link status is indicated using the top-left status LED. Once power has been supplied to the unit the link status LED turns red. The link status LED turns amber when a link is established with a link speed of 100 Mbps.

Link activity is indicated using the top-right status LED which blinks when data is incoming, or when outgoing data is sensed on the port.

Fig 1-2: Power, Link, and Activity LEDs

#### **Dante Controller**

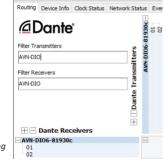

Once a link has been established Dante Controller can be used to configure the device. Dante Controller is an application provided by Audinate and can be downloaded from their website.

https://www.audinate.com/

Within Dante Controller the unit should be visible within the Routing tab.

Fig 1-3: Routing

5

#### **Network Troubleshooting**

The device can be seen within Dante® Controller if it is connected to the same network as the computer. If the device doesn't show up in Dante® Controller please check that the connection to the network is correct and that the device and computer are on the same network.

If the computer and the device are on different IP subnets, the device will appear in Dante® Controller with red text:

Fig 1-4: Red Device Name Indicates Different Network Subnet

Opening the **Device View** for the device will provide details about the problem.

- Multiple DHCP servers on the network
   Using a static IP address on a local interface that is on a different subnet to the DHCP address ained by the device

- Resolved device address on Dante interface is 192.168.1.200 Local address on Primary Dante interface 'Ethernet 2' is 10.0.60.1/255 0.0 0
- Fig 1-5: Problem Details

In this example notice the device is on the 192.168.1.X subnet and the computer is on the 10.X.X.X subnet. To correct this, edit the computer's IP address.

In Windows 10, type View Network Connections into the search bar. Right-click the network that the device is connected to and select Properties. Double click

Internet Protocol Obtain an IP address automatically Version 4 (TCP/IPv4) Use the following IP address: in the item list and IP address: 192 . 168 . 1 . 201 edit the IP address. 255 . 255 . 255 . Ol Subnet mask: Fia 1-6: Windows IPv4 <u>D</u>efault gateway: Settinas

Device Config Network Config AES67 Config

This feature cannot be configured

Obtain an IP Address Automatically (default)

IP Address: 10 . 0 . 60 . 2

Netmask: 255 . 0 . 0 . 0

DNS Server: . . . .

Gateway: . . . . .

Apply Revert

Reboot Clear Config

Manually configure an IP Address

Save the changes made to the settings then close and re-open Dante® Controller. The device should now appear correctly. If the device name is still red, you may need to disable the other network connections on the computer. To do this, in Windows 10, type View Network Connections into the search bar. Right-click the network connection to disable and select Disable.

Now that the device appears in Dante® Controller, it can be configured and the

network settings can be modified so that the device is in the correct subnet.

Open the **Device View** for the device and select the Network Config tab. Within this tab are options to obtain an IP address automatically, or to configure an IP address manually.

After configuring the devices address, click the Reboot button and then revert your computers IP address so that it is on the original subnet using the process above.

For more troubleshooting information please see the official Dante® FAQs at:

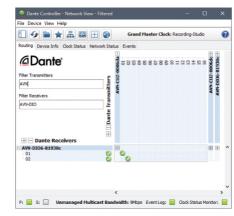

https://www.audinate.com/resources/faqs

And Dante® Controller User Guide at:

https://dev.audinate.com/GA/dante-controller/userguide/pdf/latest/

#### **Routing Audio**

Audio can be routed seamlessly between each Dante® enabled device on the network by creating connections between the transmit channel of one device and the receive channel of another device. When a routing is initially created, an hour glass is displayed to show the connection is being created. After a short time a green tick is displayed to indicate the connection has been created successfully

Fia 1-8: Routed Audio Stream

Transmitters and receivers can also be filtered by typing a name into the corresponding filter field. Further filtering options are available from the filter pane.

To remove a connection simply click on the green tick.

Transmit and receive channels in a diagonal can be quickly routed together by holding Ctrl and clicking on the minimise/maximise button on the routing grid.

• Device Name

• Sample Rate

Device Latency

An option is also available

to clear the configuration,

resetting all settings to

their default values.

Encoding

Clocking

#### **Device View**

Open up the **Device View** by double clicking on the device name in the routing grid.

#### Status

Within the **Status** tab, information about the device can be seen, such as the product type and the current IP address.

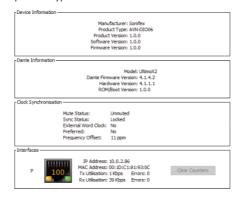

Fig 1-9: Status

#### **Device Configuration**

Within the **Device Config** tab the following can be modified.
