

Sonifex for hospital radio station upgrade in the UK

by David Fox

Sonifex S2 mixers have been installed at Hospital Radio Wey at St. Peter's Hospital in Surrey, UK, as part of a major studio refit.

With two studios at its disposal, Hospital Radio Wey covers a number of local hospital sites and care homes.

As part of the long-term refurbishment initiative, the same S2 digital I/O analogue radio broadcast mixers have been installed in both studios, ensuring familiarity to the presenters whichever studio they are using. The mixers are 20 channels wide and are being used in conjunction with Sonifex HY-02 and HY-03 telephone hybrids.

Technics SL-1200 turntables, Denon DN-C635 CD players, Tascam MD350 mini-disk players, and Tascam combined cassette and CD-RW recorders are also part of the technical set-up at the Hospital Radio Wey studios.
