Radio Bedside Refreshes with Sonifex

Hospital Radio Bedside (HRB) recently refurbished both of its on-air studios to help improve visibility for

► ENGLAND

the guests.

To achieve this goal, HRB Engineer Simon Davies installed Sonifex S2 split mixers without meterbridges. Sonifex supplier Westcountry Broadcast furnished the studio in a mahogany finish with matching mahogany meterbridge

pods, which were placed between the mixer sections with the computer monitors behind the mixer chassis.

HRB also installed Sonifex SignalLED studio signs and a Sonifex RB-SS10 10 way stereo analog source selector/mixer as part of the refit.

Volunteer-run HRB is based at the Royal Bournemouth Hospital in Dorset, England, and broadcasts to five local hospitals, as well as online.
