Kiel University mobile on S1

Fachhochschule Kiel University of Applied Sciences in Kiel, Germany has installed a Sonifex S1 digital/analog radio mixer as a mobile console. The University offers courses in Multimedia Production and has editing suites and a radio studio. A recent overhaul of the old static studio facilities led to its replacement with a tailor-made mobile studio unit, which facilitates student operation in several auditoria, while offering flexibility and ease of use during regular live productions and radio broadcasts.

'The Sonifex S1 is perfect, it meets all of our technical requirements: the size, technical properties such as the number of channels, diversity of audio connections, routing, measurement, programmability, intuitive usage and it looks and feels good too,' said installing system engineer Arne Heyna from viz<a>con.
